

CARDINAL
DVP37829 - CHANDELIER
FINISH: EBONY W/ VODKA
ICE GLASS

A LIGHTING FIXTURE IS
FAR MORE THAN JUST A
SOURCE OF ILLUMINATION
IN YOUR HOME.

IT IS A **REFLECTION**
OF WHO YOU ARE, AND
HOW YOU WANT TO
BE SEEN.

CAROUSEL
DVP36525 - CHANDELIER
FINISH: BRASS W/ MILKY SWIRL GLASS

CEILING COLLECTIONS

Once, lighting your home was just a matter of going out and selecting a fixture for your kitchen or dining room and then all the accompanying pieces for the rest of your space came as part of that first selection. "Staying in Family" for your lighting was the way to go, and stepping out of that box was a rare and often frowned-upon decorating choice.

Those days are gone now. In its place is an eclectic and infinite diversity of choice which allows you to make each room in your house speak for itself with an infinite diversity and combination of style, shape and colour.

DVI strives to offer a wide-ranging selection of lighting choices for your space. Colour, glass and decorative elements can create linkages beyond cookie cutter styling. Trends come and go, with an increasing speed that seems to mock the stolid styles of "mid-century" or "transitional". Today, the only limitation when lighting your space is your imagination, and DVI is proud to help your vision come true.

FLUSH MOUNT COLLECTIONS

In residential lighting, ceiling height matters when determining what kind of light can go in which kind of space.

Fortunately, elegant lighting isn't limited to pendants and chandeliers. Flush Mounts (tight to the ceiling) and semi-Flush Mounts (slightly dropped from the ceiling) come in all shapes and sizes and are traditionally used in smaller spaces with lower ceilings where a pendant or chandelier just won't fit.

DVI is proud to offer a diverse and wide ranging offering of flush and semi-Flush Mounts for your needs. Whether modern, traditional, rustic or industrial we've got the right style for your needs. We carry a diverse product offering that offers integrated LED lighting that means you never have to change a light bulb as well as pieces that use replaceable bulbs on a fixture that can and will last a lifetime. Diffuse or directional lighting is also an important decision many dismiss in lighting a room properly. A directional light when combined with pot lights and table and floor lamps creates a layered lighting environment, allowing you to change your lighting mood as you please. When layering the lighting isn't possible, a high lumen diffuse fixture can light a room on its own and when lit with the proper colour temperature and a good dimmer, on its own can create a unique mood for your space.

A modern hallway featuring a wooden door, a tufted bench, and a circular ceiling light. The hallway is lined with light-colored, flush-mount cabinets. A dark, textured rug is placed on the wooden floor in front of the door. A tufted bench is positioned on the left side of the hallway. A circular ceiling light fixture is mounted on the ceiling.

A modern walk-in shower with a glass door and white subway tiles. The shower features a black frame, a black showerhead, and a black handheld shower wand. The walls are covered in white subway tiles, and the floor is made of grey stone tiles. A small wooden stool with a white towel and some toiletries is placed inside the shower. The shower is set in a bathroom with a wooden ceiling and a wooden vanity with a white countertop and sink. A window in the background shows a green lawn and trees.

PRECIPICE
DVP37595 - VANITY
FINISH: EBONY W/ HALF
OPAL ACRYLIC SHADE

A modern bathroom vanity with a large mirror and a textured white cabinet. The mirror reflects a shower area with a glass door and a showerhead. The vanity is illuminated by a warm, ambient light.

VANITY COLLECTIONS

When renovating your bathroom to reflect your new style, searching for the perfect reading sconce to light up that shadowy corner, or looking for the right light source to frame and illuminate your art, wall lighting is often a style choice first and functionality a neglected afterthought. While refreshing the look of the wall light is often the reason for purchase, today's consumer no longer needs to compromise on function while choosing their style choice. Wall lights are usually the hardest working light sources in a home. Brightness and dimmability are critical and many lighting brands in their quest to offer bulb-free LED offerings. Before you buy, make sure that your new wall light delivers more than "night light" brightness. Delivered lumens are the key, and any light source that delivers less than 750 lumens should only be counted on to provide ambiance, not light up a space.

In our integrated LED offerings, most of our wall lighting now provides more than 100 lumens/inch, an amount of light that is like the old incandescent bulbed fixtures from a decade ago. In addition, many of our LED sconces and vanities offer 3 or 5 colour choices of LED, allowing you to choose between a warm tone, mid-tone or daylight, all up to you to decide with a flick of a switch at any time, tomorrow of five years from now.

In our bulb-based products, we are proud to offer even more choice on traditionally lamped vanities and sconces through our wide assortment of lightbulbs, which allows you a range of styles and brightness with low energy consumption that has never existed before in the lightbulb industry.

OUTDOOR COLLECTIONS

When lighting your outdoor space, before you select the shape of your lighting you need to understand how you want to light your space.

When lighting a tight space(s) or a walking path, directional lighting like cylinders or wall washers produce an intense amount of light downwards (and in some cases upwards) but throw their light to the ground in the immediate area.

When trying to light a general area, lanterns and cages that come with a range of glass options and allow the light to diffuse into the general area are a better choice.

Integrated LED outdoor fixtures are wonderful ways to eliminate the need to change bulbs, but make sure that weather conditions like extreme heat or snowfall buildup on the light aren't impediments to LED lifespan before you buy.

Finally, foyers and large porticos demand a larger size hanging fixture rather than the fixtures you are putting on the wall. Also note that in some environments, like saltwater coastal areas or areas of high-humidity finishes rapidly deteriorate and fading is to be expected.
